

WPC DOORS

PVC / WPC DOOR

WPC DOOR
& WINDOW
FRAME

1. Easy installing, building block mode. Only after screwing, WPC door can be installed directly and the ALC panel and frame no need plane or paint.
2. As it is resistant to the vagaries of nature, it is quite long lasting and durable compared to the wooden and metal, it hardly requires any type of protective layer or paint, although these doors weigh less, it is quite strong and provides adequate protection to homes and buildings, today these doors are used in most of the places including offices, apartments and other buildings.
3. Versatile product. WPC door can be nailed, cut, sawed according to the requirements of the homeowners, it is therefore widely preferred by most of the people.
4. Low maintenance - WPC door hardly requires any sort of maintenance apart from regular cleaning, wooden doors need to be painted occasionally to retain its glow and value, these maintain its form and color for very long period, it is therefore considered to be one of the most economical varieties used in homes and apartments.
5. Attractive - Most of the WPC doors are attractive as it includes a variety of designs and styles, considered to be the best material for any type of interior decoration, most of WPC doors include smooth and bright surfaces which add to the decor of the home.
